Voltile	Register	Restrict
Binary Streams	Text Streams	fopen
fclose	fread	fwrite
fseek	fflush	ftell
fgetc	fputc	fgets
fputs		

3	2	1
Modifier to let C know that only one pointer should exist for a specific variable	Modifier to mark that a variable should be stored in a CPU register	Modifier to mark a variable to not be optimized during compilation

6	5	4
Function for opening a file in C	Character oriented file streams where each byte is interpreted as a char	Byte oriented file streams in which files are unstructured

9	8	7
Function to write raw bytes into a file	Function to read in raw bytes from a file	Function to close a file in C

12	11	10
Function to get the current location in the file	Forces a system call to write all data buffered for stream	Function to move to an arbitrary location in a file

15	14	13
Function to read in a line from a file	Function to put a character into a file	Function to get a character from a file

		16
		Function to write a line to a file
